---

1. INTRODUCTION

The purpose of this document is to define the visual appearance, interface components and user experience of FILMORA.

FILMORA will use a modern cinematic interface inspired by premium movie streaming platforms.

The design will focus on simplicity, elegance, movie discovery and comfortable video viewing.

The interface must make it easy for users to discover movies and watch authorized full-length content.

2. UI/UX DESIGN OBJECTIVES

The design must achieve the following objectives:

1. Create a professional streaming platform appearance.
2. Provide intuitive website navigation.

3. Make movie discovery easy.
4. Display movie information clearly.
5. Provide an immersive viewing experience.
6. Maintain consistent design across all pages.
7. Support mobile and desktop devices.
8. Minimize unnecessary interface elements.
9. Provide smooth and understandable interactions.
10. Maintain accessibility and readability.

3. BRAND IDENTITY

3.1 Website name

FILMORA

3.2 Brand personality

FILMORA should communicate:

- Entertainment.
- Cinema.
- Discovery.
- Modern technology.
- Simplicity.
- Immersive viewing.

3.3 Brand slogan

FILMORA — YOUR WORLD OF MOVIES.

3.4 Logo requirements

The logo should:

- Display the FILMORA name.
- Use a bold, modern typeface.
- Include a distinctive cinematic symbol.
- Use the primary red accent.
- Work on dark backgrounds.
- Remain recognizable at small sizes.

The logo will appear in the navigation bar, login page, registration page and footer.

4. COLOR SYSTEM

The entire website will use a dark cinematic color palette.

Color Name	Hex Code	Usage
Primary Background	#09090F	Main website background
Secondary Background	#12121B	Sections and panels
Card Background	#1B1B27	Movie cards
Primary Red	#E50935	Buttons and accents
Dark Red	#B80729	Hover effects
Pure White	#FFFFFF	Main text
Light Gray	#CCCCCC	Secondary text
Muted Gray	#888888	Metadata
Border Gray	#292936	Borders and dividers
Success Green	#22C55E	Success messages
Warning Orange	#F59E0B	Warning messages

4.1 Color usage rules

- Red should be used for important actions.
- White should be used for headings.
- Gray should be used for secondary information.
- Dark backgrounds should dominate the interface.
- Green should only indicate successful operations.
- Orange should indicate warnings.

5. TYPOGRAPHY

5.1 Primary fonts

Font	Usage
Poppins	Headings

Font	Usage
Inter	General interface text
Arial	Fallback

5.2 Typography hierarchy

Element	Proposed Size
Main hero title	42–56px
Page heading	30–36px
Section heading	22–28px
Movie title	15–18px
Body text	14–16px
Metadata	12–14px
Button text	14–16px

Font sizes must adapt to smaller screens.

6. ICONS AND GRAPHICS

FILMORA will use consistent icons.

Required icons:

- Home.
- Search.
- User.
- Play.
- Pause.
- Volume.
- Fullscreen.
- Heart.
- Bookmark.
- Star.
- Settings.

- Bell.
- Arrow.
- Logout.
- Menu.

Icons should use a consistent visual style.

SVG icons or a suitable icon library may be used.

7. WEBSITE LAYOUT

The general website layout will contain:

1. Navigation bar.
2. Main content.
3. Footer.

7.1 Main layout principles

- Full-width content sections.
- Consistent horizontal spacing.
- Responsive containers.
- Clear visual hierarchy.
- Consistent alignment.
- Reusable interface components.

8. NAVIGATION BAR DESIGN

The navigation bar will appear at the top of the main website pages.

8.1 Navigation elements

Element	**Function**
FILMORA Logo	Return to homepage
Home	Open homepage
Movies	Browse movies
Genres	Browse categories
Search	Search for movies

Element	Function
Notifications	View notifications
Profile	Open user menu

8.2 Visual requirements

- Dark background.
- Fixed or sticky positioning where appropriate.
- Red logo accent.
- White navigation text.
- Subtle hover effects.
- Responsive mobile navigation.

The navigation bar should remain simple and uncluttered.

9. HOMEPAGE DESIGN

The homepage is the most important discovery interface.

9.1 Hero section

The hero section will display a large featured movie.

Required elements:

- Large cinematic backdrop.
- Dark gradient overlay.
- Movie title.
- Movie description.
- Release year.
- Genre.
- Age classification.
- Watch Now button.
- More Info button.

9.2 Movie collections

The homepage will contain the following collections:

1. Trending Now.

2. Popular Movies.
3. Recently Added.
4. Continue Watching.
5. Recommended For You.
6. Top Rated.
7. Action Movies.
8. Comedy Movies.
9. Horror Movies.
10. Romance Movies.

Collections should use horizontal movie carousels.

9.3 Homepage visual hierarchy

The featured movie must receive the most visual attention.

Movie collections should be arranged beneath the hero section.

10. MOVIE CARD DESIGN

Every movie card should contain:

- Movie poster.
- Movie title.
- Release year.
- Rating where available.

On hover, the card may display:

- Play button.
- Short description.
- Genre.
- More information.
- Watchlist action.

10.1 Movie card behavior

- Smooth hover transition.
- Slight enlargement.
- Rounded corners.

- Image zoom effect.
- Clear click interaction.
- Consistent image dimensions.

11. MOVIE CAROUSEL DESIGN

Movie collections will use horizontal scrolling.

Requirements:

- Left navigation arrow.
- Right navigation arrow.
- Smooth scrolling.
- Responsive card widths.
- Touch gestures on mobile.
- Consistent spacing.

12. MOVIE DETAILS PAGE DESIGN

The movie details page will provide complete information about a selected movie.

12.1 Main layout

The top section will contain:

- Large movie backdrop.
- Dark gradient overlay.
- Movie title.
- Movie description.
- Release year.
- Duration.
- Genre.
- Rating.
- Watch Now button.
- Add to Watchlist button.

12.2 Additional information

Below the main section:

- Movie poster.

- Cast.
- Director.
- Language.
- Subtitles.
- Audio options.
- Reviews.
- Similar movies.

13. MOVIE PLAYER DESIGN

The movie player must provide a clean and immersive viewing experience.

13.1 Player interface

The player should include:

- Video display.
- Play and pause.
- Progress bar.
- Volume control.
- Fullscreen.
- Subtitle selection.
- Audio selection.
- Quality selection where supported.
- Playback speed selection where supported.

13.2 Player appearance

- Black background.
- Minimal control panel.
- White icons.
- Red playback progress.
- Clear loading indicator.

Controls should appear when the user interacts with the player and fade when appropriate.

14. REGISTRATION PAGE DESIGN

The registration page will use a centered form.

Required fields:

- Full name.
- Username.
- Email.
- Password.
- Confirm password.

Additional elements:

- FILMORA logo.
- Create Account heading.
- Register button.
- Login link.
- Form validation messages.
- Password visibility control.

The page should use a dark cinematic background.

15. LOGIN PAGE DESIGN

The login page should contain:

- FILMORA logo.
- Welcome heading.
- Email input.
- Password input.
- Remember-me option where supported.
- Login button.
- Forgot password link.
- Registration link.

Error messages should be displayed clearly.

16. PASSWORD RECOVERY DESIGN

The password recovery interface will contain:

- Email input.
- Submit button.

- Confirmation message.
- Return to login link.

The password reset page will contain:

- New password input.
- Confirm password input.
- Reset password button.

17. SEARCH INTERFACE DESIGN

The search interface should contain:

- Search input.
- Search icon.
- Clear button.
- Search results.
- Movie suggestions where available.
- Empty search results message.

Search results will appear in a responsive movie grid.

18. GENRE AND CATEGORY DESIGN

Each genre page should display:

- Genre title.
- Short description.
- Movie collection.
- Filtering controls.
- Sorting controls.
- Pagination.

Genre cards should use consistent images and typography.

19. USER DASHBOARD DESIGN

The dashboard will provide a personal overview.

Sections:

- Welcome message.
- Profile summary.

- Continue Watching.
- Recently Watched.
- My Watchlist.
- My Favorites.
- Account Settings.

20. USER PROFILE DESIGN

The profile page will display:

- Profile picture.
- Username.
- Email address.
- Full name.
- Account creation date.
- Profile editing controls.

Account settings will include:

- Change password.
- Update profile.
- Manage sessions.
- Notification preferences.
- Account deletion.

21. WATCHLIST DESIGN

The watchlist page will display all saved movies.

Each item should show:

- Poster.
- Title.
- Release year.
- Rating.
- Remove button.
- Movie details action.

The page must include an empty-state message when the user has no saved movies.

22. FAVORITES DESIGN

The favorites page will use a responsive movie grid.

Each movie card will contain a favorite indicator.

Users can remove movies from their favorites.

23. WATCH HISTORY DESIGN

The watch history page will display previously watched movies.

Each movie item should show:

- Poster.
- Movie title.
- Last watched date.
- Viewing progress.
- Continue Watching button.
- Remove history option.

24. REVIEWS AND RATINGS DESIGN

The review interface will contain:

- Five-star rating selector.
- Review text area.
- Submit button.
- Review list.
- User information.
- Review date.

Average movie ratings should be displayed clearly.

25. NOTIFICATION DESIGN

The notification interface should contain:

- Notification icon.
- Unread notification indicator.
- Notification panel.
- Notification title.
- Notification message.

- Date.
- Mark as read action.

26. ADMIN DASHBOARD DESIGN

The administration interface must use a separate dashboard layout.

26.1 Sidebar navigation

- Dashboard.
- Movies.
- Add Movie.
- Genres.
- Categories.
- Users.
- Media.
- Reviews.
- Reports.
- Notifications.
- Settings.
- Logout.

26.2 Dashboard statistics

Display cards containing:

- Total users.
- Total movies.
- Total views.
- New registrations.
- Pending reports.
- Processing videos.

26.3 Dashboard visual design

- Dark sidebar.
- Dark content background.
- Red accent.

- Statistics cards.
- Data tables.
- Charts where useful.
- Clear action buttons.

27. MOVIE MANAGEMENT DESIGN

The movie management interface will contain:

- Movie listing table.
- Movie search.
- Add movie button.
- Edit action.
- Archive action.
- Publish status.
- Upload status.

The movie creation form will contain:

- Movie title.
- Description.
- Release date.
- Duration.
- Genres.
- Cast.
- Director.
- Poster upload.
- Backdrop upload.
- Video upload.
- Content rights information.

28. USER MANAGEMENT DESIGN

The user management page will display:

- User ID.
- Username.

- Email.
- Registration date.
- Account status.
- Role.

Available actions:

- View user.
- Search user.
- Change permitted account status.
- Manage roles.
- Review reports.

29. MEDIA UPLOAD DESIGN

The media upload interface will support:

- Movie poster uploads.
- Backdrop uploads.
- Video uploads.
- Subtitle uploads.

The interface should display:

- Selected filename.
- File size.
- Upload progress.
- Processing status.
- Success or error messages.

Only authorized media may be uploaded and published.

30. FOOTER DESIGN

The website footer will contain:

- FILMORA logo.
- About Us.
- Contact Us.
- Privacy Policy.

- Terms and Conditions.
- Content Rights Information.
- Copyright information.

The footer must maintain the dark cinematic design.

31. RESPONSIVE DESIGN

FILMORA must adapt to three primary device categories.

31.1 Desktop

- Full navigation.
- Large hero banners.
- Multi-column movie grids.
- Full movie player.
- Sidebar administration dashboard.

31.2 Tablet

- Compact navigation.
- Reduced movie card sizes.
- Responsive sections.
- Adapted dashboard layouts.

31.3 Mobile

- Mobile navigation.
- Compact movie cards.
- Touch-friendly controls.
- Single or two-column grids.
- Full-width forms.
- Responsive video playback.

32. ANIMATIONS AND INTERACTIONS

The website may use:

- Smooth scrolling.
- Movie card hover animations.
- Button hover effects.

- Fade-in transitions.
- Modal animations.
- Loading animations.
- Navigation transitions.

Animations must remain subtle and must not interfere with usability.

33. LOADING AND ERROR STATES

Every important interface must provide feedback.

Required states:

- Loading spinner.
- Skeleton movie cards.
- Empty movie collections.
- No search results.
- Network error.
- Authentication error.
- Video loading error.
- Upload failure.
- Success notification.

34. ACCESSIBILITY REQUIREMENTS

The design must support:

- Keyboard navigation.
- Visible focus indicators.
- Sufficient color contrast.
- Accessible form labels.
- Meaningful image descriptions.
- Screen reader compatibility.
- Video captions where available.
- Reduced-motion preferences.

35. FINAL DESIGN GUIDELINES

All FILMORA pages must follow the same design system.

The following rules are mandatory:

1. Maintain consistent colors.
2. Maintain consistent typography.
3. Reuse movie card components.
4. Maintain consistent button styles.
5. Use responsive layouts.
6. Avoid unnecessary interface complexity.
7. Maintain clear navigation.
8. Provide appropriate feedback.
9. Prioritize movie discovery.
10. Provide an immersive viewing experience.

FINAL UI/UX DESIGN PRINCIPLE

FILMORA will use a modern dark cinematic design with red accents, elegant typography, visually attractive movie collections and a clean streaming interface.

The user experience will prioritize easy navigation, movie discovery, account management and comfortable full-length movie playback.

The administration interface will follow the same visual identity while providing professional content management tools.

DOCUMENT STATUS: PROPOSED — AWAITING APPROVAL

FILMORA — YOUR WORLD OF MOVIES.
